

# Tomer Bourstein

Frontend Developer

Self-taught JavaScript enthusiast with quick learning abilities, diligent, ambitious and highly motivated. I enjoy creating web applications with React and know my way around with essential JavaScript libraries.

## Projects

---

### Quiz Game

A single page multiplayer online trivia quiz game built with React.JS.

Using Material-UI and CSS 3 for styling, and Google Firebase for database and authentication control.

[Click for App](#), [Click for Repository](#)

### Cocktails App

A single page cocktails menu based on different user's preferences, favorites and custom cocktails built with React.JS.

Using Material-UI and CSS 3 for styling, and Google Firebase for database and authentication control.

[Click for App](#), [Click for Repository](#)

### Kuperman Cookies

An e-Commerce single page for purchasing cookies built with React.JS.

Using React Bootstrap and CSS 3 for styling, and Google Firebase for database control.

[Click for App](#), [Click for Repository](#)

### The Witcher Typing Contest

A single page typing contest with "The Witcher" theme built with React.JS.

Using Canva for design and CSS 3 for styling.

[Click for App](#), [Click for Repository](#)

### To Do List

Create, delete, filter and change the order of assignments. Mobile compatible and dark mode selection. Using

JavaScript and jQuery for functionality, and CSS 3 and Bootstrap for styling.

[Click for App](#), [Click for Repository](#)

### My Portfolio

A single page React.JS app that displays the work of a developer, built without additional open-source libraries.

Using Canva for design and CSS 3 for styling.
