PROJECTS

MY PORTFOLIO   [App] [Code]

Single-page React.JS app showcasing a developer's work, built without additional open-source libraries. Utilized Canva for design and implemented CSS 3 for styling.

AI ENGLISH TUTOR   [Code]

Developed an AI English teacher app using React.js, Next.js, Material-UI, and Canva for design. Integrated OpenAI API for creating unseen tests. (Mock data used in production).

NEWS DASHBOARD   [App] [Code]

Built a news dashboard with categories using React.JS, Material-UI, and Canva for design. Firebase manages database and authentication. Utilized News API for news data (Mock data used in production).

QUIZ GAME   [App] [Code]

Multiplayer online trivia quiz game built with React.JS, Material-UI, and CSS 3. Utilized Google Firebase for database and authentication control.

COCKTAILS MENU APP   [App] [Code]

Single-page cocktails menu based on user preferences, favorites, and custom cocktails using React.JS. Integrated Material-UI and CSS 3 for design, employed Google Firebase for database and authentication.

KUPERMAN COOKIES   [App] [Code]

E-Commerce single page for purchasing cookies built with React.JS, React Bootstrap, and CSS 3. Leveraged Google Firebase for database control.

THE WITCHER TYPING CONTEST   [App] [Code]

Single-page typing contest with "The Witcher" theme built using React.JS and CSS 3. Utilized Canva for design.

TO-DO LIST   [App] [Code]

Mobile-compatible task management application with features like create, delete, filter, and dark mode. - Implemented JavaScript, jQuery, CSS 3, and Bootstrap.
